

Rainstorm in a Jar

Materials:

- 6-8 cotton balls (clouds)
- 3-5 yellow or blue matchsticks (lightning) - can also use paper straws cut up into smaller pieces
- ½ cup of rice
- 1 drop of blue food coloring
- teaspoon of white glitter
- 1 plastic jar or container w/lid

Before you begin: dye the ½ cup of rice with 1 drop of food coloring in a small bag. Shake the bag up until most of the rice is blue.

1. Place cotton balls inside the jar to create the clouds for your rainstorm.
2. Take your matchsticks and carefully place them in your jar (spread them out so it looks like bolts of lightning).
3. Take the teaspoon of white glitter and sprinkle it in the bag of blue rice. Shake up the bag a few times.
4. Carefully pour the rice into the jar and close the lid.
5. Shake it up and make it rain!

Enjoy! 😊
